# LUMBER GOES UP IN PRICE AND IN BUILDINGS, TOO

Increased Costs Do Not Prevent Increased Sales and Homes Rise Everywhere

Lumber is going up in Honolulu, in two ways-in cost and in houses.

Despite the fact that the cost of good old Douglas fir jumped \$2.50 per thousand feet September 1, island folk keep right on building bungalows, garages and bathhouses with undiminished ardor and apparently there is to be no decrease in the steady growth of residences here.

Bespeaking considerable for the prosperity of the United States in general and that of Hawaii in particular the growing demand for lumber at higher cost for homes here is remarkable.

F. J. Lowrey, president of Lewers & Cooke, one of the largest lumber dealers in the islands, explains why Honolulu's building operations continues apace with other years, if not ahead. 'Times are so prosperous with

he says, "tkat they paid little attention to the additional cost of lumber." "And what is the cause of all this rise in cost of ordinary lumber, piled high and long in many a Puget Sound yard, rotting for lack of buyers?" some of the more inquisitive might in-

those who had planned to build here,"

Old Bugbear, Freight

It is the same old bugbear, the freight rates. Bottoms have become so scarce on the Pacific that many lumber mills which depended entirely on waterway transportation have been closed for months, many almost back to the day the European war began. and every month saw an increase in freight rates, and a corresponding jump in the cost of lumber transported only by ships.

It would sound like the strangest kind of fiction to say that the freight rate on a thousand feet of lumber from the Pacific coast to Honolulu is at present greater than the cost of a thousand feet of the same lumber. laid down here with everything paid. was in 1894, but such is the case. And still bungalows are popping up in every part of Honolulu.

In 1894 lumber sold here for \$16.50 per thousand feet and the freight rate for the same from the coast was about \$4, according to figures obtained from Allen & Robinson, one of Honolulu's largest lumber concerns. Since then the price has raised gradually but steadily, going to \$22.50 in 1899 and touching the apex this year at \$40.

Buildings Going Up

Take a Rapid Transit car; go in any direction, look out for the vacant lots and the triangular piles of neatwithout seeing a residence going up or being completed. From Royal Grove in Walkiki to the McInerny Tract, Kalihi way: from the memory than the memory that th Tract, Kalihi way; from the mountains to the sea, are dotted here and there new buildings appearing faster, so it is estimated, than ever before.

Allen & Robinson officials admit that peace in Europe might bring a sudden drop in lumber but opine that the increased demand for construction purposes all over the world the moment the war ended might keep the price at the present figure for some practically positive that such will be curities during the week. Such by Charles S. Judd, superintendent of

former has three and the latter, two, Thursday and Friday. and both charter many more in the

"Although the cost of lumber has been raised about \$9 per thousand feet in the last year," says J. E. Jaeger of Allen & Robinson Lumber Company, The directors learned that never be-"few who planned a home have decided not to build now. Figuring 10,000 feet for the average bungalow there would only be an increased cost of about \$90 in the necessary lumber." Lowrey of Lewers & Cooke says

Delay in completing the road. Bockus was told by the contractor, men on the work. Since January last, Rooms in this two-story addition the contractor said, he has employed to the hotel's accommodations will be more than 1000 men and at the time he spoke he had about 80 on the work. beach as every one of the 12 spacious | The weather there is very hot in sumapartments is being redecorated, fin- mer and men preferred going where more comfortable, or less uncomfortable jobs could be had. The constant changing of forces prevented the secompany has erected an extension to curing of extra data and definite anne garage, across Kalakaua avenue nouncements of a date for com-

Ballast Needs Explained Necessity of ballasting the road

and costs of so doing were next taken up. "There has been much misunderstanding here as to this," said Bockus and he proceeded to explain. The lower part of the road will have to be ballasted a distance of not more than 10 miles. "A man fike Ginaca, skilled and expert engineer with his knowledge, would not think of building a road across a low country which becomes soft when it rains, without ballasting. He has always intended to do so. The general manager has also had this is mind at all times. The rainy season there is expected in January and it will be done well in advance of that time." As to costs this matter is not so material as some have thought for Bockus learned that the cost of ballasting will be only \$200 a mile or \$2000 for the whole distance. The upper part of the road he found was built on rock | and would need no ballasting. The cost figures were given him by the general manager.

New cars and engines have been ordered but not yet delivered. There but other deeds of the Spreckels estate should be no delay in this, however, Bockus says, as it is not difficult to secure narrow gage rolling stock. Chrome Deposit Large

With Dr. Anderson, Bockus visited the chrome deposit and says they found that in quantity and quality it had been underestimated. About 5,-000 tons were ready for shipment and a very large amount in sight. This is the material that is to bring \$18 a ton and upwards according to grading.

The factory at Patterson for producing magnesia dioxide, chalcide magnesia and ground silica was expected to be ready for operation in three weeks. Power motors, crushers, digesters, retorts and ball mill were already installed.

Handsome Profits Here Although other products are nearer 181 and 182, sec B, Palolo Hill tract. at hand preference is to be given mangasite since it gives the biggest profit, now being worth \$175 to \$185 per ton. The general manager estimates the cost of production at not exceeding \$20. The present plant has a capacity of 25 tons daily and is so constructed that a second unit of the same capacity can be added as retd. to Ellen D. Keller, lot 55. New quired and at any time, thus doubling
